Website: [www.millikenturf.com](http://www.millikenturf.com)

Milliken Turf Products is a leading supplier of specialty products for turfgrass management. Since 1981 we have offered solutions to the key problems facing turfgrass managers. From our beginning with Blazon® Spray Pattern Indicator, a non-staining colorant for accurate spray applications, Milliken Turf Products has developed a targeted offering which focuses on bringing to market product solutions that will improve the quality and performance of turf. The addition of the Emerald Isle line of products for Soil, Stress, Thatch and Nutrition Management, brings us ever closer to complete alignment with turfgrass management needs.

Milliken Turf Products is part of Milliken Chemical, which is a Division of Milliken & Company. Milliken & Company is privately held and has been in business for over 135 years. Milliken & Company is a major force in textiles and specialty chemical products in the United States and internationally. Visit our websites at [www.millikenturf.com](http://www.millikenturf.com), [www.millikenchemical.com](http://www.millikenchemical.com) for more information on our company.

At Syngenta, our vision is to provide the best products and services in the turf and ornamental industry and to build optimal packages of chemistries and technologies to help our customers achieve their goals. Syngenta offers industry leading products to help prevent/cure diseases and manage turf and ornamentals with fungicides, plant growth regulators, herbicides and insecticides including Banner MAXXä, Daconil®, Heritage®, Primo MAXXä, Flagship®, Barricade® and Bonzi®. In addition to a strong product portfolio, Syngenta has the industry's most complete line of non-product offerings. These include the web-based service GreenCast™ ([www.greencastonline.com](http://www.greencastonline.com)) that can deliver pest, weather and product information directly to a customer's desktop. Syngenta also has five field technical managers (which include former extension agents and university researchers, all with many years of industry experience) who live and work in all districts across the U.S. Through the GreenPartnersä ([www.greenpartnersonline.com](http://www.greenpartnersonline.com)) reward program, customers can accrue points for each Syngenta product purchase. These points can be redeemed for business tools such as computers, equipment, and educational opportunities through industry association courses, conferences and self-study videos and seminars.

Becker Underwood isn't afraid of what the future will bring. We believe the right combination of elements can turn any challenge into an opportunity. That's science - the science of innovation. As a leading supplier to the turf industry, Becker Underwood produces an innovative array of bio-pesticides, spray indicators, turf paints, lake and mulch colorants, and an ever-growing line of bio-agronomic products that enhance plant health and root development. Becker Underwood's close alliance with groups like ITODA is part of our strategy to understand the customer and their needs. Driven by the challenges facing its customers, Becker Underwood is constantly seeking innovative answers, and turning customer challenges into opportunities. This "drive to discover" has led to the establishment of high standards at research and production facilities using strict ISO 9001 standards. This same quality is reflected in customer-focused field support staff, dedicated to strengthening the business of their customers. Becker Underwood has sales and manufacturing facilities in Ames, Iowa; St. Joseph, Missouri; Caldwell, Idaho; Saskatoon, Saskatchewan, Canada; Littlehampton, UK; Pinhais, Brazil; Toulouse, France; Buenos Aires, Argentina; and Somersby, Australia.
